IWSFG Template for reviewer comments and IWSFG secretariat observation

Document reviewed: **PAS 3**

Due date:2017//

1 Te=Technical, Ge=General, Ed=Editorial

Initial	Starting Line Number (e.g. 17)	Ending Line Number (e.g. 23)	Clause/ Subclause (e.g. 3.1)	Type of comment[1]	Comments	Proposed change	Observation of the secretariat
SV	253	253	10.3	te	The sewage water temperature rages between 10° and 20°C . In Indiana at times dipping below 10° in the winter. The proposed test method allows for temperatures up to 23° C (20° +/-3°). I believe the test method should use the minimum of the range instead of the maximum.	Change the test temperature to 10° C
